Re: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109
IBSF File No. SAT-MOD-20101118-00239

5 January 2012

Dear Secretary,

As a user of high-precision GPS, I **oppose** LightSquared's requests to affirm its license, and go forward with its plan. LightSquared should not be allowed to proceed until it can be shown that its plan will not interfere with high-precision GPS. Independent test results have shown that interference generated by LightSquared transmissions can disrupt the much less powerful GPS signals. If this system is deployed, not only will Surveyors abilities be impacted, but also hundreds of thousands of people and businesses who use our data will be harmed.

Thank you for your consideration in this matter.
